- Short Reflection: What did you learn from this activity?

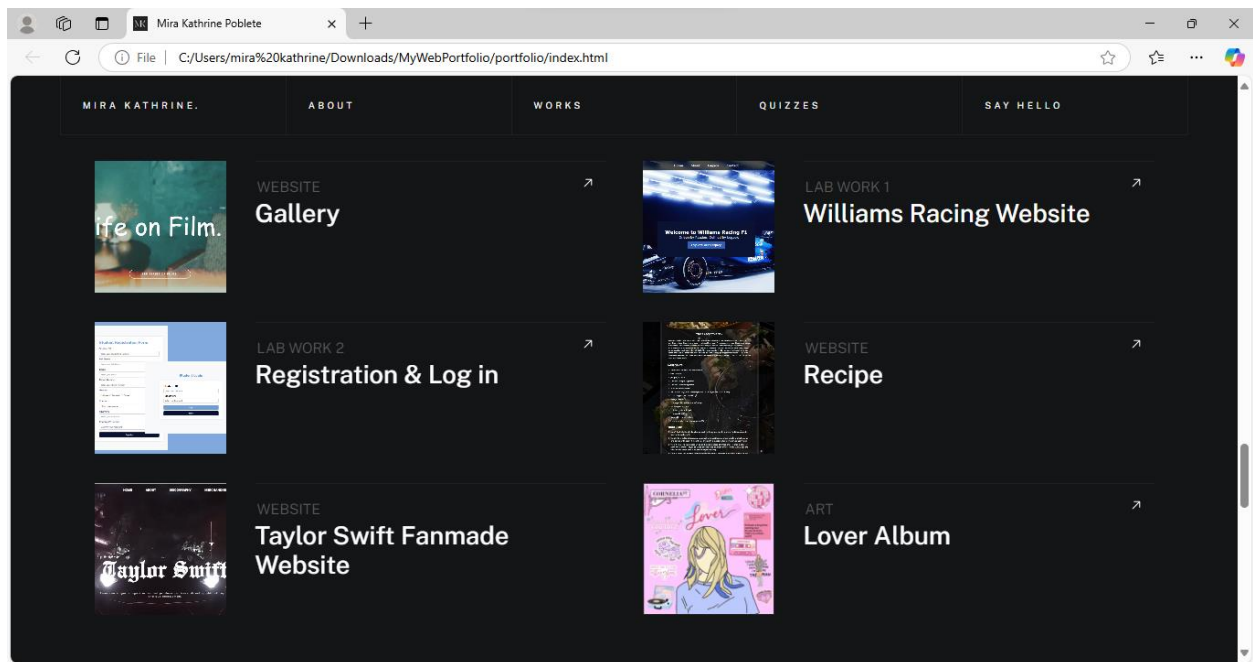

Through this activity, I learned how to design and build a personal portfolio website that reflects both my personality and professional skills. I was able to apply layout techniques, organize content effectively, and create a user-friendly experience. I also practiced working with modals, navigation links, and project showcases, which helped me improve my front-end development skills. Most importantly, I learned how important it is to create a portfolio that feels personal yet professional, making it easier for people to get to know who I am, what I do, and how they can reach out to me.

12. MULTIPLE CHOICE: Read the question carefully and understand, and choose the right answer from the choices (1 point)

1. A company wants to design a website that adapts to different screen sizes. What HCI principle should they prioritize?  
A. Visibility B. Consistency C. Responsiveness D. Affordance

2. A user struggles to remember a 16-character password. Which usability principle can improve this experience?

HELLO WORLD

# I am Mira Kathrine A. Poblete

PROJECTS | SKILLS | ABOUT | CONTACT

## ABOUT

I'm a Junior student pursuing a Bachelor of Science in Information Technology at Cavite State University - Silang Campus. I chose IT because I wanted to challenge myself, and while I don't exactly excel in programming, I've found my strengths in design. Even though my skills lean more toward UI/UX and front-end development, my real goal is to break into cloud engineering. I know I have a long way to go, but I'm constantly learning, exploring new technologies, and pushing myself toward that path.

## EXPERTISE

### Web Design, Graphic Design, UI/UX Design.

## EXPERIENCE

### Hello World

Wrote my first line of code

I learned Java in senior high school, but I quickly realized that back-end development isn't my cup of tea. Instead, I found myself more drawn to front-end development.

## EDUCATION

### Cavite State University

Bachelor of Science in Information Technology

Currently pursuing my degree in Information Technology, where I am honing my skills in networking, UI/UX, and front-end design.

### Philippine Christian University - Dasmariñas

Computer Programming (Senior High School)

Completed my senior high school education with a focus on computer programming. This was where I first learned Java and built a foundation in coding, sparking my interest in front-end development and user experience design.

## MY WORKS

### Here are some of my projects I have done. Feel free to check them out.
